

Teach Kids Ordinal Numbers to 10

The Tower Garden Flex has 7 sections where the plants can grow. If you count the green tub, the top piece, and the 'shower cap' you have 10 pieces to work with.

Before you build the Tower Garden, cut out and tape the numbers to each piece in the order they'll be assembled. The green tub is first. The base with the first growing section is second. The remainder of the growing sections are 3-8. The top piece with the holes in it is 9, and the 'shower cap' on the top is 10.

Talk with your kids about how the green tub is first, then help them build the Tower Garden in the order the pieces were marked ending with the 'shower cap.'

Need supplies and don't have a distributor? Visit skoontz.towergarden.com to order rockwool, mineral blend, and more. Email me at steve@tgardener.com with questions. More curriculum available at www.tgardener.com/curriculum.
